Consider the options:

Is it possible to:
(i) prevent the production of waste (waste avoidance)
(ii) minimise the waste (waste minimisation)
(iii) recover or recycle the waste (waste recovering or recycling)
(iv) treat the waste (waste treatment)

Unavoidable Waste

Non-Hazardous

Identify, analyse and classify the wastes.

Compare the substances and characteristics with those listed in the First, Second and Third Schedules of the Hazardous Wastes Regulations.

Hazardous Waste

Register with the Enforcing Agency

Containment

Labelling

Storage

Transportation

Treatment

Disposal

Inventory (every 3 months)

Submit inventories to Enforcing Agency

* Footnote: The waste generator or consignor has to make arrangement with the operator of the disposal facilities (final or interim) prior to the transportation of the hazardous wastes to the disposal facility.
